

BluOr Bank AS DISCLOSURE INFORMATION STATEMENT (PILLAR 3)

www.bluorbank.lv

BluOr Bank AS (hereinafter - the Bank) publishes this information notice, disclosing information regarding the year 2024 in accordance with the Regulation (EU) No 575/2013 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and investment firms and amending Regulation (EU) No 648/2012.

For disclosure purposes, the Bank uses the templates laid down in Commission Implementing Regulation (EU) 2021/637 of 15 March 2021 laying down implementing technical standards with regard to public disclosures by institutions of the information referred to in Titles II and III of Part Eight of Regulation (EU) No 575/2013 of the European Parliament and of the Council and repealing Commission Implementing Regulation (EU) No 1423/2013, Commission Delegated Regulation (EU) 2015/1555, Commission Implementing Regulation (EU) 2016/200 and Commission Delegated Regulation (EU) 2017/2295, in which the figures are stated in thousands of euros (EUR `000) as at the end of the reporting period (31 December 2024).

Considering that the Bank does not apply the IRB approach, the internal model method, or the internal model approach for market risk in its operations, and does not engage in certain transactions or provide specific financial services (for example, collateral in derivative transactions, exposures to central counterparties, securitisation exposures in the non-trading portfolio, credit derivative exposures, or equity instruments held by insurance or reinsurance undertakings or insurance holding companies which are not deducted from own funds), and is not part of a financial conglomerate, the Bank therefore does not disclose templates EU CR8, EU CCR7, EU MR2-B, EU CR10, EU CCR4, EU CCR5, EU CCR7, EU CCR8, EU SEC1, EU SEC2, EU SEC3, EU SEC4, EU SEC5, EU CR6, EU CR7-A, EU CR7, EU MR2-A, EU MR3, EU MR4, EU INS1, EU INS2, EU CRE, EU CR6-A, EU CR9, EU CR9.1, EU CCR6, EU SECA, EU MRB at this time.

The disclosure statement is provided at the level of the prudential consolidation group (hereinafter – the Group).

Table EU LIQB on qualitative information on LCR, which complements template EU LIQ1.

| Row number | Qualitative information - Free format | |
|---------------|--|--|
| a) | Explanations on the main drivers of LCR results and the evolution of the contri- bution of inputs to the LCR's calculation over time | The result of the LCR is facilitated by the size of the liquidity buffer con- sisting predominantly of balances with the Central Bank and EU central government bonds, the volume of outflows consisting predominantly of balances on current accounts and term deposits, as well as incoming cash flows from lending transactions and balances on nostro accounts. Over time, as the loan portfolio increases, the ratio may decrease, however, when new deposits are attracted, the ratio increases. |
| b) | Explanations on the changes in the LCR over time | When placing financing in illiquid assets, including loans, liquidity reserves decrease and, consequently, the ratio decreases. Also, during periods when some concentrated part of term deposits falls on the 30-day horizon, outgoing cash flows increase and, as a result, the ratio decreases. The increase in the ratio is facilitated by attracting financing both in term deposits and in the form of balances on current accounts. |
| c) | Explanations on the actual concentra- tion of funding sources | Most of the term deposits are attracted from individuals through online deposit platforms. At the level of depositors, they are diversified; term deposits of no more than EUR 100 thousand are attracted from one individual. Concentration is formed by dependence on platforms. The rest of the term deposits mainly consists of financing attracted from various financial institutions. Current account balances are sufficiently well diversified. |
| d) | High-level description of the composi- tion of the institution's liquidity buffer | The Bank's liquidity buffer as a whole consists of balances with the Central Bank and EU central government bonds. |
| e) | Derivative exposures and potential collateral calls | The amount of derivative transactions carried out by the Bank is not very significant, mostly they consist of the Bank transactions for hedging the currency position and transactions of the Bank's clients. |
| F) | Currency mismatch in the LCR | Currency mismatch in the LCR is not significant, 98% of the Bank's assets and 99% of the Bank's liabilities are denominated in EUR. |
| g) | Other items in the LCR calculation that are not captured in the LCR disclosure template but that the institution considers relevant for its liquidity profile | All important elements contributing to the LCR result are reflected in the LCR disclosure template. |

Table EU ORA – Qualitative information on operational risk.

| Legal basis | Row number | Qualitative information – Free format |
|--|---------------|--|
| Article 435(1)(a) (b)(c)(d) Capital Requirements | a) | In accordance with the Bank's business lines and the complexity of its operations, the Bank develops a Risk Management Strategy and material risk management policies, which are approved by the Supervisory Board. |
| Regulation (CRR) | | The objective of the Bank's Risk Management Strategy is to establish the fundamental principles fo identifying and managing the risks inherent in the Bank's operations, including risk measurement assessment, control, and the provision of risk reports to the Bank's management or the relevan committee. |
| | | The objective of managing non-financial risks, including operational risk, is to establish an effective system for managing non-financial risks within the Bank in order to protect the Bank and the Group from various types of financial losses, as well as from reputational damage to the Bank, ensuring th stability and security of its operations. The Bank's management, consisting of the Supervisory Boar and the Management Board, is responsible for the overall management of non-financial risks within the Bank and the Group. The execution of comprehensive risk control functions in day-to-day operations, the establishment, oversight, and improvement of the risk management system, as well a the control and monitoring functions related to risk management across all structural units of the Bank, are carried out by the Bank's Chief Risk Officer. The Risk Committee, whose role is to support the Supervisory Board by overseeing the risks to which the Bank and the Group are exposed in their operations, and monitoring the compliance of the Bank' and the Group's activities with the established risk levels, including the supervision of the implementation of the Risk Management Committee is responsible for developing and reviewing proposals, as well as making decisions aimed at improving the non-financial risk management measures within the Bank's core operational - Superational Risk Management (ORMD). ORMD is responsible for developing and testing the approach to operational risk usentification system, for developing and testing the approach to operational risk dentification and assessment, and for developing procedures and measures to limit and mitigate operational risk into the following main categories: Personnel risk Process risk Process risk Process risk Process risk If risk External risk operational risk appetite is characterised by: The process of introducing new products and services; Information on actual and potential losses due to operational risk servents. The dentification on |
| | | The Bank applies the following approaches for the identification and assessment of operational risk: Assessing the operational risks inherent in business lines/processes; Evaluating IT systems and IT infrastructure; Ensuring that before the introduction of new financial services or significant changes to existin financial services, the associated operational risks are identified and assessed; Ensuring that the information on complaints from clients and counterparties, data on leg: proceedings involving the Bank, and data on sanctions and fines imposed on the Bank is dul registered; Defining approaches for identifying and managing IT risks; Organizing operational risk self-assessments; Defining and monitoring operational risk indicators; Conducting stress testing; Assessing the adequacy of the minimum operational risk capital requirement, which is calculate using the Basic Indicator Approach, to cover the operational risks inherent in the operations of th Bank and the Group; Reviewing the results of external audits and horizontal reviews that include non-financial risks. ORMD, in collaboration with the Bank's structural units, conducts a business impact analysis. |
| | | The information obtained through the operational risk monitoring process regarding potential changes in the level of operational risk is consolidated semi-annually and submitted to the Nor Financial Risk Management Committee, the Management Board, the Risk Committee, and th Supervisory Board. |

Ι

| Article 446 CRR | Ь) | To calculate the amount of capital required to cover operational risk, the Bank applies the Basic Indicator Approach as described in the Regulation (EU) No 575/2013 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and investment firms and amending Regulation (EU) No 648/2012. In addition, the Bank assesses whether compliance with the own funds requirement of the operational risk calculated in accordance with the above approach ensures that the amount of capital required to cover the operational risk thus calculated is sufficient to cover the operational risk inherent in the Bank's activities. When conducting stress testing, the Bank analyses how its level of operational risk, income, or ability to continue operations may be affected by, for example: changes in the operating environment, low- probability events, outsourcing, potential penalties, regulatory changes, and other possible factors. As a result, the Bank determines whether the amount of capital required to cover operational risk, calculated using the Basic Indicator Approach, is sufficient to cover the operational risk inherent in the Bank's activities. |

| Row num- ber | Qualitative information – Free format | Legal basis |
|--------------------|---|------------------------------|
| a) | A description of how the institution defines IRRBB for purposes of risk control and measurement. | Article 448(1), point (e) |
| | Interest rate risk in the banking book (IRRBB) refers to the potential losses or reduction in profits for the Bank and the Group arising from changes in interest rates at which the Bank and the Group borrow and place funds. Interest rate risk comprises the following components: Basis risk – the risk of incurring losses due to changes in interest rates affecting interest rates as sensitive instruments that have the same repricing or maturity dates but are linked to different reference rates; Yield curve risk – the risk of incurring losses due to mismatches in the term structure of interest rate-sensitive instruments, covering changes in the interest rate term structure that occur either uniformly across the yield curve (parallel risk) or differently across time intervals (non-parallel risk); Optionality risk – the risk of incurring losses when interest rate-sensitive instruments contain explicit (e.g., options contracts) or implicit options (e.g., loans with prepayment features, demand deposits, term deposits with early withdrawal options, fixed-rate loan commitments, etc.) that allow either the Bank or its clients to alter the amount or timing of cash flows in response to changes in interest rates. | |
| b) | A description of the institution's overall IRRBB management and mitigation strategies. Most of the Bank's and the Group's non-trading book assets are interest rate-sensitive assets, in accordance with Regulation No. 254. These assets primarily consist of claims on credit institutions and central banks, as well as portfolios of debt securities and loans. A significant portion of the Bank's and the Group's liabilities also consists of interest rate-sensitive assets, primarily comprising customer term deposits (mostly with maturities of up to one year), demand deposits, subordinated liabilities, as well as off-balance sheet commitments. The mutual delimitation between the non-trading and trading books, as well as the framework and oversight of internal risk transfers between the portfolios, are governed by the Bank's Investment Policy. The Bank and the Group use changes in the economic value of equity (EVE) and net interest income (NII) as the primary approaches for assessing interest rate risk. The economic value of equity of the Bank and the Group represents the net present value (NPV) of the interest rate risk-sensitive instruments' cash flows in the non-trading book, excluding equity from the cash flows. It is calculated over the remaining maturity, which refers to the period from the last day of the assessment period until the contractual maturity date or the date on which the relevant amount must be repaid or the interest rate reset, in accordance with the terms of the agreement. Changes in the economic value of equity (EVE) of the Bank and the Group are defined as the difference between the projected economic value or EVE under a stress scenario and the projected economic value or EVE under a baseline scenario. The baseline scenario is based on forecasts of the Bank's and the Group's operations, economic development, and business environment, and it also takes into account the balance of value impairments. Changes in the net interest income (NII) of the Bank and the Group are defined | Article 448(1), point (f) |

| f) | f) A high-level description of how the institution hedges its IRRBB, as well as the associated accounting treatment (if applicable). The Bank regularly identifies and assesses its exposure to interest rate risk, and, in order to mitigate this risk, if necessary: The Bank issues loans with variable/floating interest rates or with fixed interest rates for relatively short terms; The Bank sensures a relatively low sensitivity of its bond portfolios' value to potential changes in interest rates; The Bank strives to maintain a significant positive spread between the interest rates on assets and liabilities, as well as between interest income and expenses, in order to keep its net interest income as high as possible in absolute terms; The Bank sets various types of limits related to IRRBB; Currently, certain special market instruments for mitigating IRRBB (hedging) are not being used. | | | | |

Ι

| g) | A description of key modelling and parametric assumptions used for the IRRBB measures in template EU IRRBB1 (if applicable). The unconditional cash flow approach is used for cash flow modelling, where the amount and term of the cash flows are not dependent on a specific interest rate change scenario, but the constructed cash flows are consistently used across all scenarios. In constructing cash flows, the Bank and the Group apply behavioural modelling assumptions for non-maturity deposits (NMDs) – including demand deposits, current accounts, and savings accounts – based on their historical volatility parameters. The option of early withdrawal of term deposits is assessed, and based on the evaluation results, this component is incorporated into the cash flow modelling. The option for early repayment of fixed-rate loans is assessed, and if it is deemed significant, it is incorporated into the cash flow modelling based on the evaluation results. The interbank unsecured overnight rate curve is used as the risk-free yield curve. | Article 448(1), point (c); Article 448(2) Article 448(2) |
|---------|--|---|

| | Business strategy and processes | |
| a) | Institution's business strategy to integrate environmental factors and risks, taking into account the impact of environmental factors and risks on institution's business environment, business model, strategy and financial planning | The Bank's Council has approved the Bank's Strategy for the next three years, including the core principles of sustainability and ESG risk strategies. Based on the business model and key types of financial services, the Bank and the Group have established a Sustainability and ESG Strategy, which includes short-term, medium-term, and long-term sustainability strategic goals, objectives, and key approaches to achieve them. The foundation of the Sustainability and ESG Strategy is the operation of the Bank and all commercial entities of the Group as sustainable, efficient, and socially responsible businesses with good corporate governance. |
| b) | Objectives, targets and limits to assess and address environmental risk in short-, medium-, and long-term, and performance assessment against these objectives, targets and limits, including forward-looking information in the design of business strategy and processes | In its strategy, based on the United Nations Sustainable Development Goals (SDGs), the Bank sets its sustainability objectives for investments and loan portfolios. The UN SDGs that the Bank has chosen as the foundation for its sustainable financing are as follows: 7 - Ensure access to affordable, reliable, sustainable and modern energy for all; 8 - Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all; 9 - Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation; |
| c) | Current investment activities and (future) investment targets towards environmental objectives and EU Taxonomy-aligned activities | 10 - Reduce inequality within and among countries; 11 - Make cities and human settlements inclusive, safe, resilient and sustainable; 12 - Ensure sustainable consumption and production patterns; 13 - Take urgent action to combat climate change and its impacts; |
| d) | Policies and procedures relating to direct and indirect engagement with new or existing counterparties on their strategies to mitigate and reduce environmental risks | 14 - Conserve and sustainably use the oceans, seas and marine resources for sustainable development; 15 - Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss. Based on the strategy approved by the Bank's Council, the Bank has incorporated specific measures into its internal regulations to ensure the achievement of the sustainability goals set out in the strategy, both directly and indirectly. Before making a decision on financing any new investment or loan project, the Bank evaluates the ESG risks and the project's alignment with the Bank's Strategy. |
| | Governance | |
| e) | Responsibilities of the management body for setting the risk framework, supervising and managing the implementation of the objectives, strategy and policies in the context of environmental risk management covering relevant transmission channels | Risk management is a set of measures designed to reduce the likelihood of the Bank and the Group incurring direct or indirect losses from its business activities, as well as to ensure the preservation of the Bank's and the Group's asset values. The organisational structure of risk management is designed to be transparent and appropriate to the size of the Bank and the Group, as well as the risks associated with their activities. The tasks of each organisational unit are defined in the Bank's organisational structure regulations or in separate regulations approved by the Bank's Board. The responsibilities, main tasks, and duties of the organisational units, decision-making bodies, employees, and members of the Board in the risk management processes are |
| f) | Management body's integration of short-, medium- and long-term effects of environmental factors and risks, organisational structure both within business lines and internal control functions | outlined in the Bank's regulatory documents. The Council is the Bank's supervisory body, representing the interests of the shareholders, overseeing the activities of the Board, approving the Bank's strategy, Risk Management Strategy and policies, and other relevant documents, and monitoring their implementation within the Bank and across the entire Group. The Council oversees how the Board implements the goals and objectives set out in the Bank's strategy, including monitoring how and to what extent sustainability and ESG risk management objectives are being achieved, regularly receiving reports and information. The Bank has established a Risk Committee, whose |
| g) | Integration of measures to manage environmental factors and risks in internal governance arrangements, including the role of committees, the allocation of tasks and responsibilities, and the feedback loop from risk management to the management body covering relevant transmission channels | purpose is to advise the Council and provide support regarding the Bank's and the Group's current and future risk strategies, including changes to them, considering changes in the Bank's and the Group's operations and external factors, and to assist the Council in monitoring their implementation. The Bank's Board addresses all issues related to the Bank's operations, except those that fall under the competence of the shareholders' meeting and the Council, and regularly provides information to the Bank's Council and the Risk Committee regarding the Bank's and the Group's operations, including information on ESG risk management and the progress in achieving the goals set out in the Bank's Strategy. ESG risk management measures and the evaluation of ESG factors before making decisions on investments or granting new loans are outlined in the Bank's regulatory documents. |
| h) | Lines of reporting and frequency of reporting relating to environmental risk | The Financial Analysis and Financial Risk Management Department and the Chief Risk Officer regularly prepare information for the Council and the Board on ESG risk management. |
| i) | Alignment of the remuneration policy with institution's environmental risk-related objectives | In its regulatory document, which defines the procedure for identifying positions that influence the risk profile and the individuals holding these positions within the Bank and the Group's commercial entities, the Bank has established the procedure and criteria for determining the variable portion of employee remuneration. This document also specifies the criteria for determining the variable portion of remuneration based on the achievement of goals set in the Bank's strategy and Credit Policy, related to environmental risk and the alignment of loan projects with environmentally sustainable goals. |

| | Risk management | |
|----|--|--|
| j) | Integration of short-, medium- and long-term effects of environmental factors and risks in the risk framework | The Bank has integrated ESG risk management measures into its processes, starting from the Bank's Strategy, Risk Management Strategy and policies, to procedures and methodologies, in areas where decision-making takes place and regular informing of the Bank's management about the results of achieving the objectives set out in the Bank's Strategy. |
| k) | Definitions, methodologies and international standards on which the environmental risk management framework is based | The Bank has conducted an ESG risk materiality assessment with the further aim of developing the most appropriate Sustainability Strategy for the Bank. The ESG risk materiality assessment conducted by the Bank included an evaluation of the Bank's own assets (investments, Ioan portfolio), qualitatively and quantitatively assessing the Bank's activities and geographical locations of assets (collateral) involved in exposures, as well as evaluating the Bank's general governance processes, considering |
| I) | Processes to identify, measure and monitor activities and exposures (and collateral where applicable) sensitive to environmental risks, covering relevant transmission channels | the potential short-term and long-term financial impact and impact on reputation based on various criteria. By evaluating the Bank's business types and volumes, the impact of ESG risks on the risks inherent in the Bank's business activities (credit risk, liquidity risk, market risk, and operational risk) was assessed. As a result of the ESG risk materiality assessment, recommendations and tasks were compiled for more effective ESG risk management. |
| m) | Activities, commitments and exposures contributing to mitigate environmental risks | To ensure the assessment of ESG risks before transactions are conducted, the Bank has specified in its documents the information and data that need to be collected and evaluated before making a decision, as well as the requirements for documenting the ESG risk assessment. |
| n) | Implementation of tools for identification, measurement and management of environmental risks | |
| 0) | Results and outcome of the risk tools implemented and the estimated impact of environmental risk on capital and liquidity risk profile | |

|---------------|---|---|
| | Business strategy and processes | |
| a) | Adjustment of the institution's business strategy to integrate social factors and risks taking into account the impact of social risk on the institution's business environment, business model, strategy and financial planning | As a responsible business operator, the Bank has identified socially responsible measures in its strategy, ensuring an appropriate working environment, personnel development, and engagement within the Bank, as well as undertaking socially responsible initiatives for the benefit of society. |
| b) | Objectives, targets and limits to assess and address social risk in short-term, medium-term and long-term, and performance assessment against these objectives, targets and limits, including forward-looking information in the design of business strategy and processes | |
| c) | Policies and procedures relating to direct and indirect engagement with new or existing counterparties on their strategies to mitigate and reduce socially harmful activities | Social risk factors that may be associated with the borrower (company) and its operations are assessed before making a decision on each new loan. The Bank evaluates social risk based on information provided by the client, as well as on publicly available information that may reasonably indicate factors influencing social risk. Social risk is characterised by information about the presence of social elements in the client's operations as a business operator, such as issues related to human rights, labour law compliance, employee environment and engagement, safety, sales practices, product quality and availability, and impact on society. |
| | Governance | |
| d) | Responsibilities of the management body for setting the risk framework, supervising and managing the implementation of the objectives, strategy and policies in the context of social risk management covering counterparties' approaches to: | As a responsible business operator, the Bank has identified socially responsible measures in its strategy, ensuring an appropriate working environment, personnel development, and engagement within the Bank, as well as undertaking socially responsible initiatives for the benefit of society. |
| i) | Activities towards the community and society | |
| ii) | Employee relationships and labour standards | |
| iii) | Customer protection and product responsibility | |
| iv) | Human rights | |
| e) | Integration of measures to manage social factors and risks in internal governance arrangements, including the role of committees, the allocation of tasks and responsibilities, and the feedback loop from risk management to the management body | |
| f) | Lines of reporting and frequency of reporting relating to social risk | |

* In accordance with the Commission delegated regulation EU) 2020/1818 supplementing regulation (EU) 2016/1011 as regards minimum standards for EU Climate Transition Benchmarks - Climate Benchmark Standards Regulation - Recital 6: Sectors listed in Sections A to H and Section L of Annex I to Regulation (EC) No 1893/2006. i) - k) The Bank is developing a methodology for calculating GHG financed emissions. Client (legal entities forming the credit portfolio) surveys have been initiated, as a result of which the Bank plans to collect data on the estimated Scope 1 and Scope 2 GHG emissions of counterparties. c) The Bank is developing a methodology for identifying environmentally sustainable (CCM) assets.

Banking book - Climate change transition risk: Loans collateralised by immovable property - Energy efficiency of the collateral.

The Bank has not yet calculated its sector alignment with the Paris Agreement, but plans to develop a methodology for aligning its sectors with the Paris Agreement.

Banking book - Climate change transition risk: Exposures to top 20 carbon-intensive firms.

| | а | b | C | d | e |
|---|---|---|--|------------------------------|---|
| | Gross carrying amount (aggregate) | Gross carrying amount towards the counterparties compared to total gross carrying amount (aggregate)* | Of which environmentally sustainable (CCM) | Weighted average maturity | Number of top 20 polluting firms included |
| 1 | | | | | |

*For counterparties among the top 20 carbon emitting companies in the world.

No exposures to top 20 carbon-intensive firms were identified in the Bank's portfolio.

Banking book - Climate change physical risk: Exposures subject to physical risk.

| a | b | с | d | е | f | g | h | i | j | k | I | m | n | 0 |
|--|-----|--------------------------|-------------------------|-----------------------------|---------------|---------------------------------|---|---|--|------------------|-------------------------|--|------------------------------|--|

| | | Breakdown by maturity bu | | maturity bucl | rity bucket | | of which exposures sensitive to | of which exposures sensitive to | of which exposures sensitive to impact both from chronic and | Of which Stage 2 | Of which non- | Accumulated impairment, accumula negative changes in fair value due to o risk and provisions | | ue due to credit |
| | | <= 5 years | > 5 year <= 10 years | > 10 year <= 20 years | > 20 years | Average weighted maturity | impact from imp chronic climate acut | impact from acute climate change events | acute climate change events | exposures | performing exposures | | f which Stage 2 exposures | Of which non- performing exposures |
| 1 A - Agriculture, forestry and fishing | n/a | | | | | | | | | | | | | |
| 2 B - Mining and quarrying | n/a | | | | | | | | | | | | | |
| 3 C - Manufacturing | n/a | | | | | | | | | | | | | |
| 4 D - Electricity, gas, steam and air conditioning supply | n/a | | | | | | | | | | | | | |
| 5 E - Water supply; sewerage, waste management and remediation activities | n/a | | | | | | | | | | | | | |
| 6 F - Construction | n/a | | | | | | | | | | | | | |
| 7 G - Wholesale and retail trade; repair of motor vehicles and motorcycles | n/a | | | | | | | | | | | | | |
| 8 H - Transportation and storage | n/a | | | | | | | | | | | | | |
| 9 L - Real estate activities | n/a | | | | | | | | | | | | | |
| 10 Loans collateralised by residential immovable property | n/a | | | | | | | | | | | | | |
| 11 Loans collateralised by commercial immovable property | n/a | | | | | | | | | | | | | |
| 12 Repossessed colalterals | n/a | | | | | | | | | | | | | |
| 13 Other relevant sectors (breakdown below where relevant) | n/a | | | | | | | | | | | | | |

The Bank has identified exposures in its loan portfolio within sectors typically subject to climate change physical risk, such as agriculture, construction, and shipping. However, the methodology — which includes, among other elements, the development of detailed physical risk identification maps — is currently under development.

Summary of GAR KPIs.

| | | KPI | | |
|-----------|------------------------------|------------------------------|---|------------------------------------|
| | Climate change mitigation | Climate change adaptation | Total (Climate change mitigation + Climate change adaptation) | % coverage (over total assets)* |
| GAR stock | n/a | | | |
| GAR flow | n/a | | | |

* % of assets covered by the KPI over banks' total assets

The Bank is developing a methodology for the identification and accounting of GAR-eligible assets.

Mitigating actions: Assets for the calculation of GAR.

| 14 Local government financing | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 15 Housing financing | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 16 Other local governments financing | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 17 Collateral obtained by taking possession: residential and commercial immovable properties | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

The Bank is developing a methodology for the identification and accounting of GAR-eligible assets.

Other climate change mitigating actions that are not covered in the EU Taxonomy.

| | а | b | с | d | e | f |
|----|--|---|--|---|---|---|
| | Type of financial instrument | Type of counterparty | Gross carrying amount (million EUR) | Type of risk mitigated (Climate change transition risk) | Type of risk mitigated (Climate change physical risk) | Qualitative information on the nature of the mitigating actions |
| 1 | | Financial corporations | 1 | | | Energy-efficient buildings: residential and commercial properties based on energy efficiency certificates and building certifications. |
| 2 | Bonds (e.g. green, sustainable, sustainability-linked under standards other | Non-financial corporations | 1 | | | Green energy, sustainable transport. |
| 3 | than the EU standards) | Of which Loans collateralised by commercial immovable property | | | | |
| 4 | | Other counterparties | | | | |
| 5 | | Financial corporations | | | | |
| 6 | | Non-financial corporations | 51 | | | Energy efficiency level of class B or higher, sustainable investments in production facilities, construction and renovation of sustainable new buildings, green energy. |
| 7 | Loans (e.g. green, sustainable, sustainability-linked | Of which Loans collateralised by commercial immovable property | 21 | | | Energy efficiency level of class B or higher. |
| 8 | under standards other than the EU standards) | Households | | | | |
| 9 | | Of which Loans collateralised by residential immovable property | | | | |
| 10 | | Of which building renovation loans | | | | |
| 11 | | Other counterparties | | | | |

The Bank discloses information on assets with characteristics contributing to climate change mitigation. Once the Bank has developed a methodology for identifying GAR and has identified GAR assets falling under Regulation (EU) 2020/852, the above-mentioned assets may be reclassified as GAR.
